ABOUT US

Globetrotter Consultancy is a Malaysian-based culture transformation company founded in 2014 with clients worldwide. They are known for their results using the SIEP process to raise self-awareness and meta-cognition. This enables the individual to understand their own habit patterns, manage emotions and examine their own subconscious programming.

The program is based on bio-cybernetics; the science of control and communication of the human mind and body. The bio-cybernetics workshops enable self management and raises self-awareness in a fun and engaging way.

OUR VISION & MISSION

Globetrotter is dedicated to delivering transformative consultancy services that lead to both personal and professional fulfillment.

It's core mission revolves around empowering personal growth, happiness, and holistic well-being, ultimately contributing to a world where happiness, health, and wealth are accessible to all individuals.

OUR CLIENTS

GLOBETROTTER CONSULTANCY FLAGSHIP PROGRAM

BE AT YOUR BEST BIO-CYBERNETICS

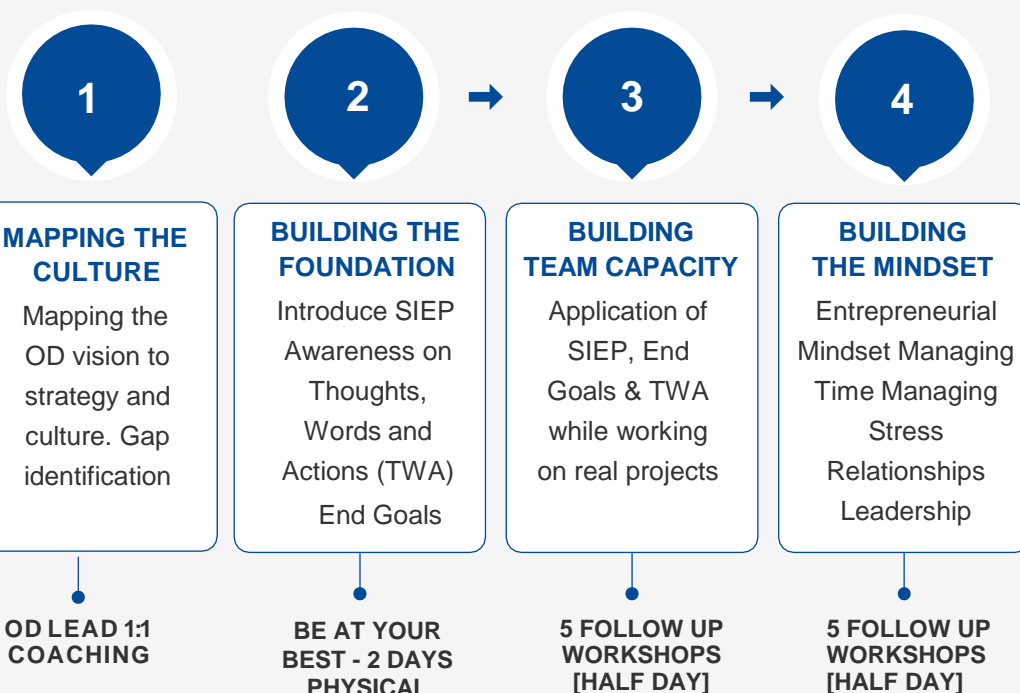

Leadership often fails when it is needed most, under stress, especially in challenging times. This is because when someone is under stress, their subconscious mind becomes activated, and the inert fears and insecurities take over the logical mind. True leadership is only possible when one can manage themselves, manage their emotions and activate their conscious mind to think clearly and make objective decisions. This is a bio-cybernetic process used in this program to manage stress, keep calm, make decisions, take risks, be innovative and be accountable.

Be At Your Best is a personal effectiveness program based on bio-cybernetics, the science of control and communication of the human mind and body. The program explores how the subconscious mind works and helps each individual align their thoughts, words, and actions to achieve their personal goals as well as the company's goals.

Designed for participants to understand & change their habit patterns and how to work with the subconscious mind to achieve their KPIs. The full program transforms the culture of the organization into a High Performing Culture, with each department supporting each other wholeheartedly.
